ARROYO SECO’S UNIQUE AND DISTINCT TREES

Noteworthy trees may represent iconic species, display a unique growth form, or stand out for their size at maturity. These trees provide significant benefits to the neighborhood council district and are listed below.

---

**Italian Cypress (Cupressus sempervirens)**
Abundant Species

Italian cypress is an evergreen species with a columnar growth pattern (narrow and upright). This species reaches a height of 70 ft and a width of 20 ft and is commonly planted as a hedge to buffer noise and pollution.

---

**Pink Trumpet Tree (Handroanthus heptaphyllus)**
Abundant Species

The common name, pink trumpet tree, describes the striking pink flowers that bloom in spring or winter. Pink trumpet tree is briefly deciduous, has a round shape, and reaches a spread up to 25 ft.

---

**Crape Myrtle (Lagerstroemia indica)**
Abundant Species

Crape myrtle is typically multi-trunked with a spreading or vase shaped canopy. This species is utility friendly, reaching a height of 25 ft. It has beautiful flowers that can be almost any shade of red, purple, pink, or white.

---

**Jacaranda (Jacaranda mimosifolia)**
Abundant Species

Jacaranda is known for its showy, fragrant flowers. Jacaranda blooms in the early summer and sometimes again in the fall. This species reaches a spread of 30 ft and attracts birds.
