BEL AIR-BEVERLY CREST’S UNIQUE AND DISTINCT TREES
Noteworthy trees may represent iconic species, display a unique growth form, or stand out for their size at maturity. These trees provide significant benefits to the neighborhood council district and are listed below.

**Canary Island Pine** (*Pinus canariensis*)
*Abundant Species*
Canary Island pine has a columnar growth habit and can reach a height of 80 ft. This evergreen is well adapted to urban environments and produces relatively long needles and large cones.

**Indian Laurel Fig** (*Ficus microcarpa*)
*Abundant Species*
Indian laurel fig is a common street tree that reaches a spread of 40 ft. It has an oval or rounded shape, evergreen foliage, and smooth grey bark. The fruits attract birds.

**Coast Live Oak** (*Quercus agrifolia*)
*Abundant Species*
Coast live oak is known for its broad canopy and ability to support a wide variety of wildlife and insects with food and habitat. Native to California, this large oak species thrives in coastal environments, can reach up to 80 ft tall and can span as broad as 70 ft.

**Jacaranda** (*Jacaranda mimosifolia*)
*Abundant Species*
Jacaranda is known for its showy, fragrant flowers. Jacaranda blooms in the early summer and sometimes again in the fall. This species reaches a spread of 30 ft and attracts birds.
