Mexican Fan Palm (Washingtonia robusta)
RAMPART VILLAGE’S UNIQUE AND DISTINCT TREES
Noteworthy trees may represent iconic species, display a unique growth form, or stand out for their size at maturity. These trees provide significant benefits to the neighborhood council district and are listed below.

Purple Orchid Tree (*Bauhinia variegata*)
Abundant Species
The purple orchid tree gets its common name from its pink to purple colored flowers that resemble an orchid. Flowering occurs in the winter or spring. This small statured species can reach a height and spread of 35 ft.

Southern Magnolia (*Magnolia grandiflora*)
Abundant Species
Southern magnolia also has showy, fragrant flowers. This species is known to attract pollinators and birds. It has glossy, evergreen foliage, a rounded shape, and can reach a spread of 60 ft.

Canary Island Date Palm (*Phoenix canariensis*)
Abundant Species
Canary Island date palm is a large palm that can reach a height of 60 ft and a spread of 40 ft. This species has a thick trunk, feathery fronds, abundant but edible fruits, and leaf scars shaped like a diamond.

Jacaranda (*Jacaranda mimosifolia*)
Abundant Species
Jacaranda is known for its showy, fragrant flowers. Jacaranda blooms in the early summer and sometimes again in the fall. This species reaches a spread of 30 ft and attracts birds.
