COASTAL SAN PEDRO’S UNIQUE AND DISTINCT TREES

Noteworthy trees may represent iconic species, display a unique growth form, or stand out for their size at maturity. These trees provide significant benefits to the neighborhood council district and are listed below.

Indian Laurel Fig *(Ficus microcarpa)*
Abundant Species

Indian laurel fig is a common street tree that reaches a spread of 40 ft. It has an oval or rounded shape, evergreen foliage, smooth grey bark. The fruits attract birds.

Carrotwood *(Cupaniopsis anacardioides)*
Abundant Species

Carrotwood has a round shape and can reach a spread of 30 ft and a height of 40 ft. This drought and wind tolerant species is widely used as a street tree. The yellow to orange dry fruits, called capsules, attract birds.

Jacaranda *(Jacaranda mimosifolia)*
Abundant Species

Jacaranda is known for its showy, fragrant flowers. Jacaranda blooms in the early summer and sometimes again in the fall. This species reaches a spread of 30 ft and attracts birds.

Bottle Tree *(Brachychiton populneus)*
Abundant Species

Bottle tree has a conical shape and can reach a spread of 30 ft and a height of 50 ft. It is a fast-growing species with evergreen foliage. Bottle tree is native to Australia and produces white flowers in the spring and summer.
