LOS FELIZ’S UNIQUE AND DISTINCT TREES

Noteworthy trees may represent iconic species, display a unique growth form, or stand out for their size at maturity. These trees provide significant benefits to the neighborhood council district and are listed below.

Deodar Cedar (*Cedrus deodara*)
Abundant Species

Deodar cedar is a conifer that reaches a height of 60 ft and a spread of 30 ft. This species, native to South Central Asia, is commonly planted as a buffer or screen. Its green foliage is tinted blue to silver/grey, and it produces large brown cones in the fall.

Southern Magnolia (*Magnolia grandiflora*)
Abundant Species

Southern magnolia is known for its fragrant, showy flowers. This species is known to attract pollinators and birds. It has glossy, evergreen foliage, a rounded shape, and can reach a spread of 60 ft.

Camphor Tree (*Cinnamomum camphora*)
Abundant Species

Camphor tree is known for its evergreen foliage and fragrant flowers and leaves. Mature camphor trees can have a spread of 60 ft and have a rounded to umbrella shaped canopy. These common street trees attract birds.

Jacaranda (*Jacaranda mimosifolia*)
Abundant Species

Jacaranda is known for its showy, fragrant flowers. Jacaranda blooms in the early summer and sometimes again in the fall. This species reaches a spread of 30 ft and attracts birds.
