VOICES’ UNIQUE AND DISTINCT TREES
Noteworthy trees may represent iconic species, display a unique growth form, or stand out for their size at maturity. These trees provide significant benefits to the Neighborhood Council District and are listed below.

**Camphor tree (Cinnamomum camphora)**
*Abundant Species*
Camphor tree is known for its evergreen foliage and fragrant flowers and leaves. Mature camphor trees can have a spread of 60 ft and have a rounded to umbrella shaped canopy. These common street trees attract birds.

---

**London Plane (Platanus x hispanica)**
*Abundant Species*
London plane is a large statured hybrid that can reach a height of 85 ft and spread of 70 ft. Several characteristics, such as the multicolored bark and achenes (the fruit/seed produced) make this species aesthetically pleasing.

---

**Benjamin Fig (Ficus benjamina)**
*Abundant Species*
Benjamin fig is an evergreen tree native to India and Malaysia. This species can provide visual and noise buffering in cityscapes due to its dense foliage. It has an oval shape, weeping branches, and a canopy spread up to 60 ft.

---

**Torrey Pine (Pinus torreyana)**
*Location: 800 block W 41st Dr*
The Torrey pine is an endangered species native to coastal sage regions of southern California. This drought tolerant species typically reaches a height around 50 ft and spread of 25 ft with a conical or vase shape.
