**Inventory Details**

Data was collected in March through June 2020 and analyzed using i-Tree Streets. Publication date: June 19, 2020
VALLEY VILLAGE’S UNIQUE AND DISTINCT TREES

Noteworthy trees may represent iconic species, display a unique growth form, or stand out for their size at maturity. These trees provide significant benefits to the neighborhood council district and are listed below.

London Plane (*Platanus x hispanica*)
Abundant Species

London plane is a large statured hybrid that can reach a height of 85 ft and spread of 70 ft. Several characteristics, such as the multicolored bark and achenes (the fruit/seed produced) make this species aesthetically pleasing.

Sweetgum (*Liquidambar styraciflua*)
Abundant Species

Sweetgum has a conical shape and can reach a spread of 40 ft and height of 80 ft. This species can exhibit vibrant fall colors. The leaves are lobbed, almost star shaped, and the dried fruits are distinct.

Aleppo Pine (*Pinus halepensis*)
11600 Block of Weddington St

Aleppo pine is native to the western Mediterranean region and reaches a height of 60 ft and spread of 40 ft. This drought tolerant species produces relatively large cones that can be up to 3 inches in length.

Southern Magnolia (*Magnolia grandiflora*)
Abundant Species

Southern magnolia’s fragrant, showy flowers attract pollinators and this species also attracts birds. It has glossy, evergreen foliage, a rounded shape, and can reach a spread of 60 ft.
