VENICE’S UNIQUE AND DISTINCT TREES
Noteworthy trees may represent iconic species, display a unique growth form, or stand out for their size at maturity. These trees provide significant benefits to the neighborhood council district and are listed below.

---

**King Palm (Archontophoenix cunninghamiana)**
Abundant Species

King palm can reach a height of 70 ft and a spread of 15 ft. This species has evergreen foliage, smooth light grey bark, and attractive red fruits. King palm is native to Australia but well adapted to California’s south coast.

---

**European Olive (Olea europaea)**
Abundant Species

European olive is known for its gnarled trunk and edible fruit. This slow-growing species is long-lived and extremely resilient. It has silvery, evergreen foliage and small white flowers which bloom in summer. European olive is native to the Mediterranean region.

---

**Queen Palm (Syagrus romanzoffiana)**
Abundant Species

Queen palm can reach a height of 50 ft and a spread of 30 ft. This species has evergreen foliage, smooth light grey to green bark, and showy white flowers. Queen palm is native to Brazil and Argentina.

---

**Jacaranda (Jacaranda mimosifolia)**
Abundant Species

Jacaranda is known for its showy, fragrant flowers. Jacaranda blooms in the early summer and sometimes again in the fall. This species reaches a spread of 30 ft and attracts birds.
