Making LA’s Street Network Safe, Mobile, and Sustainable Through Innovation, Integration and Inclusion
WILSHIRE CENTER KOREATOWN’S UNIQUE AND DISTINCT TREES

Noteworthy trees may represent iconic species, display a unique growth form, or stand out for their size at maturity. These trees provide significant benefits to the neighborhood council district and are listed below.

---

**Indian Laurel Fig** (*Ficus microcarpa*)
**Abundant Species**

Indian laurel fig is a common street tree that reaches a spread of 40 ft. It has an oval or rounded shape, evergreen foliage, smooth grey bark. The fruits attract birds.

---

**Crape Myrtle** (*Lagerstroemia indica*)
**Abundant Species**

Crape myrtle is typically multi-trunked with a spreading or vase shaped canopy. This species is utility friendly, reaching a height of 25 ft. It has beautiful flowers that can be almost any shade of red, purple, pink, or white.

---

**Queen Palm** (*Syagrus romanzoffiana*)
**Abundant Species**

Queen palm can reach a height of 50 ft and a spread of 30 ft. This species has evergreen foliage, smooth light grey to green bark, and showy white flowers. Queen palm is native to Brazil and Argentina.

---

**Southern Magnolia** (*Magnolia grandiflora*)
**Abundant Species**

Southern magnolia’s fragrant, showy flowers attract pollinators and this species also attracts birds. It has glossy, evergreen foliage, a rounded shape, and can reach a spread of 60 ft.
